PROFILE

- Motivated Computer engineering graduate with strong foundation in programming, problem-solving skill and systems design.
 - Hands-on experience in oil and gas pipeline projects, visa-vis pipeline integrity, welding inspection support, and field data collection.
 - Field coordination skills combined with progress reporting and documentation expertise.
 - Demonstrated experience delivering full-stack web solutions, leading small technical teams, and supporting clients in fast-paced environments.
 - Apply analytical and software skills in problem solving real-world problems.
 - Good team player that work effectively in multicultural settings
 - Competent in Health, Safety and Environment (HSE), implementation and compliance
 - Seeking engineering and technical roles within Oil & Gas infrastructure and energy projects
-

EDUCATION

B.Eng. Computer Engineering (Second Class Upper Division)

Michael Okpara University of Agriculture, Umudike

Umuahia, Nigeria

- **Relevant Courses:** Digital Systems Design; Computer Architecture; Data Structures and Algorithms; Microprocessors and Embedded Systems; Communication Systems; Control Systems; Software Engineering; Database Systems; Computer Networks.
-

WORK EXPERIENCE

Software Engineer / Web Developer – Gateways Healthcare (Remote)

2025 – Present

- Designed, developed, and deployed the organisation's website from scratch, including responsive front-end interfaces and secure back-end services.
- Implemented routing, authentication, and an admin panel to manage user activities, content updates, and basic analytics.

- Led a small team of developers to deliver features on time and maintain code quality.
- Collaborated with non-technical stakeholders to translate requirements into technical specifications.

Software Engineer (Intern / Contract) – TrendLarma

July 2025 – December 2025

- Built core modules for an e-commerce platform including product listings, shopping cart, and order tracking.
- Integrated payment workflows and analytics dashboards.
- Optimised database queries and API endpoints for performance.
- Conducted technical research and feasibility studies to identify and implement the most efficient tools for platform scalability.

SKILLS

- **Programming:** HTML, CSS, JavaScript, Python
- **Web Technologies:** React, Node.js, REST APIs, Next Js
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, VS Code, Linux, Docker

VOLUNTEER EXPERIENCE

Online Volunteer – Graphic Designer, United Nations Development Programme (UNDP), Djibouti (Remote)

- Designed layouts, graphics, and infographics for annual reports in French and English.
- Collaborated with communication teams to align designs with UN branding guidelines.
